

ICT AppliCaTions for sustalnable enVironmental protEction (ACTIVE) *A project funded by Erasmus+*

1. ICT AppliCaTions for sustalnable enVironmental protEction (ACTIVE) project of Nutech is a significant initiative funded by the European Union to address Pakistan's environmental challenges. With a total funding of 0.717 Million Euros, this collaborative effort is fully supported by the European Union ERASMUS+ CBHE-2022 program. The ACTIVE Project consortium comprises seven partners.

Establishment of Centre of Excellence

2. A Center of Excellence has been established at Nutech which is dedicated for using ICT applications for environmental problem-solving, marking a milestone in collaboration and knowledge exchange. H.E. Mr. Philipp Oliver Gross, H.E. Mr. Eduard Robert Preda, Ambassador of Romania to Pakistan, and the Spanish Embassy representative, Mr. Carlos inaugurated this facility during three-day Grand Consortium Summit & Erasmus+ ACTIVE Curriculum Review Meeting held at NUTECH from May 15 to 17, 2024.

3. The center aims to cultivate skilled ICT engineers with expertise in environmental science through capacity-building activities and specialized courses on advanced technologies. The center will establish four research centers focusing on local environmental challenges, providing practical training and contributing to mitigation efforts.

Admin Facilities for Project ACTIVE

3. An elaborate administrative support has been provided by NUTECH for the project active. It includes adequate human resource and office space for its smooth functioning.
