

**SECTION NOTE**  
**ADMINISTRATION DIRECTORATE – NUTECH**

**Subject: Free and Filtered Drinking Water Facility / Conservation of Water – NUTECH**

1. It is intimated that there is no CDA water supply line or underground water extraction facility available in NUTECH. Therefore, water bowsers are purchased to fulfill water requirements. University has Installed RO water purification plants along with small water filters with each water cooler to provide safe and free drinking water to students and staff
2. Moreover, during summer demand for water usage increases and for conservation of water resource NUTECH has already installed one touch taps easy to open/close and RO Plant waste water stored in underground tank is used to sprinkle water on grass and plants as per requirement.
3. Above in view, all departments are informed to instruct their staff/students to avoid wasting water and ensure saving vital resource.
4. Forwarded for info /necessary action please
