

Empowering Education for Slum Children

SDGs Description: SDG 3, 4, 8, 10 & 17

- Good Health & Well Being
- Quality Education
- Decent Work and Economic Growth
- Reduced Inequalities
- Partnerships for the Goals

Venue: Slum Areas in NUTECH Surrounding Area

Mode: Physical

Date: 14th November 2023

Duration: 1200 - 1400 hrs

Brief Explanation of the Activity

Students from the National University of Technology (NUTECH) have initiated a compassionate project aimed at providing education to children in underprivileged slum areas. This initiative, spearheaded by dedicated NUTECH volunteers, addresses the lack of accessible education for children in these communities, who often miss out on formal schooling due to socio-economic challenges.

In various makeshift outdoor classrooms, adapts teaching methods to engage and support each child. Volunteers bring materials such as slates, chalk, markers, and paper, creating an interactive learning experience. They employ creative techniques to capture the children's interest—using drawings, storytelling, and simple games that make learning enjoyable and relevant to their everyday lives.

Children are also encouraged to draw, color, and express themselves freely, building their confidence and communication skills. Volunteers from NUTECH not only teach academic content but also emphasize values like kindness, teamwork, and respect, aiming to shape well-rounded individuals.

This initiative by NUTECH students is more than just an educational endeavor; it is a movement to empower and uplift children from marginalized communities. By giving their time and knowledge, these students are making a lasting impact, fostering hope and opportunity for a brighter future for these young learners.
